

About Me

Product / UX Designer with **4 years of experience** designing complex **enterprise SaaS, AI, ERP, and B2B** products. Experienced in turning complex workflows into intuitive experiences across **AI agents, self-service platforms, analytics, enterprise administration, and configuration-heavy products**. Strong in interaction design, information architecture, design systems, prototyping, and **end-to-end product design**, partnering closely with product and engineering teams to take concepts from problem definition to delivery.

Core Skills

Design	UX Design, Product Design, Interaction Design, Information Architecture, User Flows, Wireframing, Prototyping, UI Design, Usability Testing, Responsive Design
Product & Enterprise	Enterprise SaaS, B2B Platforms, ERP, AI Products, AI Agents, Conversational AI, Self-Service Platforms, Analytics, Platform Migration, Enterprise Administration
AI & Emerging Technology	Generative AI, LLM-based Products, AI-assisted Design, AI Prototyping, AI-native Design Workflows
Design system & Tools	Design Systems, Accessibility, Figma, Claude Code, GitHub, Miro, Jira, Confluence, Adobe Creative Suite, InVision, Balsamiq, Zeplin
Collaboration	Agile, Design Critiques, Design Workshops, Stakeholder Management, Engineering Handoff, Cross-functional Collaboration

Experiences

Uniphore Sep 2023 - Aug 2026	- Shaped AI agent experiences across U-Self Serve and U-Assist, covering NLU-based capabilities such as intents, entities, and training phrases alongside LLM-based flows, skills, tasks, and conversational behaviors. - Built the AI Agents platform experience, spanning agent discovery, configuration, management, and version history to support scalable self-service AI agent creation and deployment. - Delivered Gen-AI Summary Builder and Question Manager, enabling enterprise teams to configure, test, and manage AI-generated call summaries; contributed to a ~30% reduction in After-Call Work and ~850ms average generation latency for tested workloads. - Supported U-Assist → Next-Generation Platform migration by mapping product capabilities and workflows for feature continuity, contributing to platform scaling across 1,200+ additional Farmers Insurance agents. - Defined Bot Analytics / Conversations experiences for conversation monitoring, turn-level insights, emotion analysis, and bot performance, helping contact-center teams identify opportunities for optimization. - Designed enterprise IAM and Admin experiences, covering user management, roles and permissions, account and partner management, SAML/SSO, integrations, and account configuration workflows. - Designed Capture & Legal Hold experiences, including call metrics dashboards and compliance workflows, simplifying how enterprise users monitor, manage, and retain conversation data. Strengthened the Design System through reusable components, responsive patterns, and documentation that improved consistency across enterprise products. Applied AI-native design workflows using Claude Code and GitHub, creating functional prototypes from design concepts and accelerating design-to-development collaboration through rapid experimentation.
Hikeon Technologies Sep 2022 - Aug 2023	- Designed enterprise ERP experiences across procurement, task management, products, vendors, inventory, and related operational workflows. - Designed and delivered 16+ feature modules including Task Center, Purchase Orders, Vendors, Containers, Facets & Spec Tables, Products, Returns, and related ERP workflows. - Shaped the ERP into a responsive web application, delivering 70+ UI screens and maintaining consistency across different screen sizes.

- Built and maintained **design systems** and **documentation libraries**, including style guides, reusable components, typography, color systems, and pattern libraries to improve design scalability and developer alignment.
- Collaborated with 5+ cross-functional teams, including product owners, developers, PMs, business analysts, and leadership, through workshops, design critiques, reviews, and iterative feedback.
- Created 20+ interactive prototypes to communicate workflows and validate concepts with stakeholders and engineering teams

Certificates

Aug 2020 - July 2025

UX Professional Certificate

Google

Product-led Certification

Pendo

Enterprise Design Thinking Practitioner

IBM

Introduction to Generative AI

Google

Digital skills: User Experience

Accenture

Adobe UX Foundation Learning Journey

NASSCOM Futureskill

Education

Aug 2015 - July 2020

Bachelor of Architecture

Thiagarajar College Of Engineering & School of Architecture, Madurai

Language

Professional Proficiency

English, Tamil

Beginner Proficiency

Kannada, Hindi
